

## ACS data analysis for report on reforming the Health Care Reform Act (HCRA)

Purpose: To help inform a report that will argue for substituting broad-based business taxes for the current HCRA tax levied on health insurance. This analysis will identify the industries with large numbers (and shares) of workers not covered by employer-provided health insurance, and it will provide demographic and location characteristics for those workers.

- Use 2024 5-year ACS
- Analyze for NYS resident workers (i.e., by place of residence in NYS, not place of work)

### Stage 1

- The core table will include workers by industry and by type of health insurance coverage. This table should show the numbers of workers.
  - The attached IPUMS industry list highlights in yellow the industry detail I'm looking for. I'd like to see **government** employment separated from **private** employment. Government employment is more than just Public Administration, but it also includes many workers in education, health care and transportation who work for government employers.
  - Generally, the industry list is at a 2-digit NAICS industry level, but it also includes some more detailed industries of special interest such as warehouse clubs, supercenters and other general merchandise retailers; warehouses and storage; and food services and drinking places. I suspect that these detailed industries will have high levels and shares of workers who are on Medicaid or uninsured.
  - An attached PDF file has IPUMS Health Insurance (HI) variables. All workers should be in at least one of the 7 HI categories. Workers can be covered by more than one type of insurance, e.g., some workers over 65 could be dual-eligible for Medicaid and Medicare.

### Stage 2

- After I review the HI by industry table, I will suggest a second state of analysis that will look at the geographic location and demographic characteristics of workers on Medicaid or uninsured. There will be some aggregation of workers by groups of industries with those groups determined by the Stage 1 results.

An issue I could use some help with: IPUMS indicates that beginning in 2020 or so, some government surveys included a new variable: Subsidized Marketplace Coverage (HIMARKS).

See <https://www.census.gov/programs-surveys/cps/technical-documentation/user-notes/health-insurance-user-notes/new-var-subsidized-marketplace-cov-HIMARKS.html>

This variable could be interesting to explore, but I am not sure if it is available in the IPUMS ACS data, and if not, whether we can otherwise access that data for NYS.

The 2024 ACS 5-year PUMS data, released by the Census Bureau on March 5, are now available via IPUMS USA.

## HEALTH INSURANCE VARIABLES IN THE AMERICAN COMMUNITY SURVEY

Starting with the 2008 American Community Survey (ACS) and Puerto Rican Community Survey (PRCS), the Census Bureau has included a question on health insurance coverage. The questionnaire contained the seven types of insurance listed below along with space for respondents to write in other types of coverage, which were re-classified into one of the seven types.

| Summary                                   | Public or private              | Type of insurance                   | IPUMS variable  | Data quality flag |
|-------------------------------------------|--------------------------------|-------------------------------------|-----------------|-------------------|
| Covered by any type<br>( <u>HCOVANY</u> ) | Private<br>( <u>HCOVPRIV</u> ) | (1) Employer/union                  | <u>HINSEMP</u>  | <u>QHINSEMP</u>   |
|                                           |                                | (2) Purchased directly              | <u>HINSPUR</u>  | <u>QHINSPUR</u>   |
|                                           |                                | (3) TRICARE/other military          | <u>HINSTRI</u>  | <u>QHINSTRI</u>   |
|                                           | Public<br>( <u>HCOVPUB</u> )   | (4) Medicare                        | <u>HINSCARE</u> | <u>QHINSCAR</u>   |
|                                           |                                | (5) Medicaid/other gov't assistance | <u>HINSCAID</u> | <u>QHINSCAI</u>   |
|                                           |                                | (6) VA                              | <u>HINSVA</u>   | <u>QHINSVA</u>    |
| Not covered                               |                                | (7) Indian Health Service           | <u>HINSIHS</u>  | <u>QHINSIHS</u>   |

For all variables except the data quality flags, codes of 2 indicate that a person is covered (either directly or through another household member's policy) by the given type of insurance ; codes of 1 indicate that a person is not covered. As measured by the Census Bureau, persons are considered insured (HCOVANY = 2) if they are covered by at least one of types (1) through (6). (Persons with only Indian Health Services coverage are not considered to be insured because such coverage is not always comprehensive.)

Coverage measured by HCOVANY can be broken down further into private coverage (HCOVPRIV = 2) and public coverage (HCOVPUB = 2). Private coverage includes employer- or union-provided insurance, insurance purchased directly, and TRICARE or other military health care. Public coverage includes Medicare, Medicaid or another governmental medical assistance program, and Veterans Administration health care.

Individuals can be covered by more than one type of insurance, and they can be covered by both private and public insurers. ▲

For more information, see the variable descriptions (linked above). A more complete treatment of the ACS' health insurance measurement can be found at the State Health Access Data Assistance Center's [ACS page](#) .

## SPECIAL NOTE ON THE EDITING OF HEALTH INSURANCE VARIABLES

Starting with the 2009 ACS, the Census Bureau has edited health insurance variables for consistency. The edits are described in [this Census Bureau working paper](#) . Although the original Census Bureau variables are not comparable across time due to different editing procedures, the health insurance variables in IPUMS-USA are harmonized and can be used to analyze change over time. The data quality flags for these variables contain extra codes describing whether coverage was added (codes of 3) or removed (codes of 2) via the logical edit. Although the standard variables should satisfy most users' needs, we have also included the unedited variables as they appeared in the original Census Bureau PUMS with a suffix of "2" (e.g., HCOVANY2, HINSCAID2, etc.).

### Details of the Edits in IPUMS-USA

A summary of the edits follows here (unless otherwise noted, "parent" refers to a person with a child under age 18):

- Persons who did not claim to be covered by Medicaid were assigned Medicaid coverage if they were:
  1. Less than 19 years old and the unmarried child of a parent with public assistance and/or Medicaid;
  2. A citizen parent with public assistance;
  3. A citizen parent married to a citizen with public assistance and/or Medicaid;
  4. A foster child; or
